The

KICAS

Accelerator Programme:

The aim of The KICAS Accelerator Programme is to nurture and accelerate the learning of STEM KICAS.

STEM is

- Science,
- Technology,
- Engineering &
- Maths.

STEAM

is **STEM** + the **Arts**.

KICAS is

- Knowledge,
- Insights,
- Competencies,
- Abilities and
- Skills.

The Programme advocates the **Unifiedknowledge** approach to education, which advances ways to learn STEM with the highest value of African cultural Arts as a contextual "intelligent-play" medium that better enables the learning of STEM from an African place of being. We have evidenced that learning from this place of being brings better learning attainment, objective achievement and better ways to advance in life.

STEAM

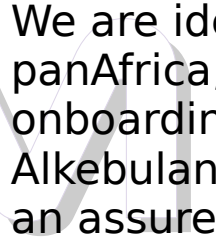

The KICAS Accelerator Programme matches groups of STEM Learners committed to self-mastery and Meta Angel Investors of high cultural integrity.

STEM Learners committed to self-mastery will gain access to a portfolio of apps that can be used to enhance learning and objective achievement; KICAS power for individual learners and their peer-group teams.

Meta Angel Investors gain the capacity to help build brilliant young people as individuals and cooperative groups, panAfrica. The AlkebulanMeta platform works to provide provable quality assurance of individual, cooperative and project level development.

We are identifying the most committed STEM Learners panAfrica, vetting and nurturing them via our OnWeb3 onboarding process. We are determined that AlkebulanMeta provides the best way for you to become an assured, impactful and respected Angel Investor today, making meaningful difference panAfrica.

You can now **sponsor a small group** of five (5) to nine (9) STEM Learners by sponsoring their OnWeb3-Passport cost; currently just £120 to £216 for 5-9 entry level NFT passports.

Education | panAfrica | Revolved

Beyond the core value of **Communal KICAS Management** AlkebulanMeta's objective is to develop our cooperative and network in terms of reach, outcomes, outputs and VPSs (visionary product-services) “fit for markets” globally.

What do we expect from you?

The key is a value we call **hashima**, which means "respect". So what should you respect?

AlkebulanMeta commands and nurtures self-respect:

In AlkebulanMeta "self" is realised across six domains the first of which are personal, family and community. When citizens form learners' cooperatives we consider this structure a bridge between family and community. We therefore reward self respect that reflects value across personal, family, cooperative and community spaces across AlkebulanMeta.

Ultimately self-respect here appears as a high regard for the most excellent principal of One's potential to learn and grow; seeing that principle equitably across One's personal, family, cooperative and community characters; identities.

Bring out the best of self, at every level:

AlkebulanMeta brings you powerful apps and valuable resources. Let every interaction you have with these apps come with the mindful intention to bring out the best of self, at every level. This is how we expect AlkebulanMeta citizens to honour the "hashima" requirement.

Here's the deeper meaning of **hashima**:

ሐሺ ማ

HASHIMA

respect

- Respect your **Inner Tutor**.
- Learning to do objective achievement; learning how to do SMART objectives; **GWU URLM SL Alama**.
- How to master and get the maximum benefit from the available apps and resources; ability to **properly value opportunities and assets**.
- How to think creatively; nurture and giving expressions to One's imagination and **best intentions**.
- How to collaborate and cooperate.
- How to **be the best communicators** and share ideas,
- How to source the appropriate help from the learners' network.
- How to project manage.
- How to raise a gig or venture plan and see a project through to full manifestation.
- How to **cost and budget** projects, ventures and KICAS development.
- How to convert personal and cooperative KICAS into **tradable asset components** within and beyond the Alkebulan Network-State.
- Learn **problem solving** processes and **constructive innovation** techniques.
- How to enhance and present your **dLinks Profile** for great network effects.

Where the story really starts.

alkebulan
Network-State

Our approach to education uses story-telling to teach science and STEM. Our first epic story is a deeply meaningful classic for both children and adults, have a listen now, it gives context and insight into how Alkebulan Network-State came into existence. Enjoy.

Our 1st Epic Story – Listen Now

“Abit & The Web of Freedom”

The story brings forward a vision of Africa (Alkebulan) where African heritage, embodied by her peoples, realises visionary leadership as; The Most Excellent Custodians of Earth.

Abit and the Web of Freedom navigates several interesting themes and intersections as defined in this ground-breaking Sci-Fu (science futures) story; African cosmology, the soil covenant; the importance of soil and minerals, entrapments of mineral mining, web3 technology and the principle of the original ledger, new ideas on land custodianship and centrally a high value of STEM from an African place of Being. Enjoy the story now.

GATEWAY

APPS GATEWAY

alkebulanmeta.app/apps-gateway

The **Assets App** is your Learning Assets store; buy OnWeb3-Passports and other EcoSysMAAT / AlkebulanMeta NFTs that open up exclusive areas in the ecosystem, purchase subscriptions and sponsorship packages to support cooperative learning and secure other advanced learning resources built to advance your success.

Chat App is your secure communications (messaging and multimedia) platform; built on the Element messaging application and the Matrix protocol.

3D-Play App is our network-state's multi-dimensional immersive space, our metaverse [in development].

dLinks App is your decentralized profile connecting the learning interests you want to share in our cooperative network with others of common interests and values.

Media App is our app for making all the media of AlkebulanMeta, that will interest you, accessible; articles, events, online mags, radio, podcasts and our 3D-Play is part of the media too.

e-Learning App is your personalised online learning environment.

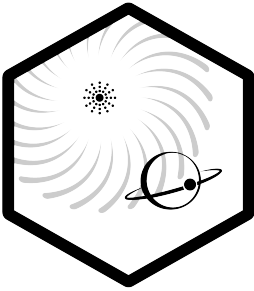

DEX App is the official decentralized exchange app for the Alkebulan Network-State [in development].

Agile App will help your objective achievement, its intuitive user interface makes project-based learning and project management easier to do well.

WellPool App is our Network-State Happiness ("GNH") Poll, stay on top of your daily wellbeing and get a unique overview to various levels of our communally self-assessed health [in development].

KICAS-PLA App is your Personal Learning Assistant app for the development of KICAS; Knowledge, Insight, Competencies, Abilities and Skills. [in development].

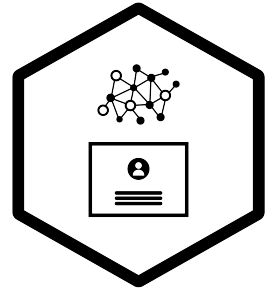

BKApp App supports members' engagement across our various Meta Readers' Rooms. [in development].
